

MICRO ESSENTIAL

LABORATORY

Hydrion® pH and sanitizer test kits since 1934

CHEMICAL SPILL TESTING MADE SAFE, FAST, AND ACCURATE

Micro Essential Laboratory, the pioneer in pH testing since 1934, now offers two indispensable tools for performing instant pH checks of spilled lab/industrial fluids—Spill Stik Plastic pH Strips and Hydrion® pH Test Paper.

Determining the pH of spilled laboratory or industrial fluids is often the critical first step in carrying out a safe clean-up. Micro Essential's Spill Stik pH Strips are the ultimate dip-and-read tool for checking the pH and assessing the risk of a spilled hazardous liquid. Like Micro Essential's Hydrion® 0-13 pH Test Paper, our Spill Stiks provide instant, accurate and easily read pH checks at each full pH unit, from strongly acidic to strongly alkaline. The Spill Stiks' 1-in. width and 6-in. length make them easy to handle at a safe distance and with a gloved hand. The large color chart that comes with each kit makes for clearer and quicker color matches.

- Essential safety tools for checking the pH of industrial spills
- Just one dip and match determines any pH from 0 to 13
- Easy-to-read chart with 14 brilliant colors gives instant, accurate results
- Safe testing made possible by the Spill Stiks' long, 6-in. handle
- Made in the U.S.A.

single kit or 10-kit case	Distributor pricing available	5 kits

How to Test Spilled Liquids

- Dip a Spill Stik or a strip of pH paper into the spilled substance.
- Remove the Stik or paper strip and immediately compare the resulting color to the color chart.
